## **DETAILED ACTION**

### ***Papers Submitted***

1. It is hereby acknowledged that the following papers have been received and placed on record in the file: IDS as received on 7/11/01, Foreign Priority Papers as received on 7/11/01, and Supplemental IDS as received on 4/08/02.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-15, drawn to instruction formats, classified in class 712, subclass 209.
  - II. Claims 16-29, drawn to code generation, classified in class 717, subclass 136.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I only claims a generic translation that any translator could perform, as evidenced in claims 10-13, and does not require the specific method of translation of Group II, as in claim 16. The subcombination has separate utility such as translating any two instruction formats that contain opcodes, and is not bound to using only the instruction formats claimed in Group I.

Art Unit: 2183

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Patrick Burns on 5/13/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
